### NOTES

This table presents data for developing countries based on data from DHS conducted since 1990. Quintiles are defined by socioeconomic status in terms of assets or wealth, rather than in terms of income or consumption. For details, see Macro International 2007b.

a. Includes tuberculosis (BCG), measles or measles, mumps and rubella (MMR) and diphtheria, pertussis and tetanus (DPT) vaccinations.

b. Based on births in the 10 years preceding the survey.

c. Figure is based on less than 50 unweighted cases.

d. Data are obtained from UNICEF 2007b.

e. Includes BCG, measles or MMR, DPT or Pentavalente, and polio vaccinations.

f. Data are from preliminary MICS reports.

g. Includes BCG, measles or MMR, DPT, polio and other vaccinations.

h. Data pertain to 5-year period preceding the survey.

i. Large sampling error due to small number of cases.
