

No. 346.—CONSUMER INCOMES: DISTRIBUTION OF FAMILIES AND SINGLE INDIVIDUALS AND OF AGGREGATE INCOME RECEIVED BY INCOME LEVEL,¹ 1935–36

Norr.—These figures are estimates based primarily on sample data collected in the Study of Consumer Purchases, a Works Progress Administration project conducted by the Bureau of Home Economics and the Bureau of Labor Statistics in cooperation with the National Resources Committee and the Central Statistical Board. Findings of that study were supplemented by income tax statistics and by other sample data on family and individual incomes.

| Income level | Families and single individuals, total | | Families | | | Single individuals | | |
|--|--|-----------------------|------------------|-----------------------|--------------------|--------------------|-----------------------|--------------------|
| | Number or amount | Percent at each level | Number or amount | Percent at each level | Cumulative percent | Number or amount | Percent at each level | Cumulative percent |
| Number of units | | | | | | | | |
| All levels..... | 39,458,300 | 100.00 | 29,400,300 | 100.00 | | 10,058,000 | 100.00 | |
| Under \$250..... | 2,123,534 | 5.38 | 1,162,800 | 3.95 | 3.95 | 960,644 | 9.55 | 9.55 |
| \$250–\$500..... | 4,587,377 | 11.63 | 17,013,394 | 30.26 | 14.21 | 1,571,983 | 15.63 | 25.18 |
| \$500–\$750..... | 5,771,960 | 14.63 | 31,643,795 | 12.92 | 27.13 | 1,972,745 | 19.62 | 44.80 |
| \$750–\$1,000..... | 5,876,078 | 14.90 | 46,544 | 4.77,048 | 14.55 | 41,631 | 1,599,030 | 15.91 |
| \$1,000–\$1,250..... | 4,990,995 | 12.65 | 59,191 | 3,882,444 | 13.20 | 54,881 | 1,108,551 | 11.02 |
| \$1,250–\$1,500..... | 3,743,428 | 9.49 | 68,682 | 2,585,472 | 9.75 | 64,633 | 877,656 | 8.73 |
| \$1,500–\$1,750..... | 2,889,904 | 7.32 | 76,162 | 2,343,358 | 7.97 | 72,609 | 546,546 | 5.43 |

¹ The estimates cover all consumers with the exception of 2,000,000 persons living in institutions or quasi-institutional groups. A family is defined as 2 or more persons sharing a common income and living under a common roof. Single individuals include persons lodging in rooming houses and hotels, living as lodgers or servants in private homes, or maintaining independent living quarters as 1-person families. Income includes the total net money income received during the year by all members of the economic family plus the value of certain items of nonmoney income, such as the occupancy of an owned home and food produced by rural families for their own use. The estimates apply to the 12-month period from July 1935 through June 1936.

² Less than 0.005 percent.

Section 13

Income, Expenditures, and Wealth

This section presents data on gross domestic product (GDP), gross national product (GNP), national and personal income, saving and investment, money income, poverty, and national and personal wealth. The data on income and expenditures measure two aspects of the U.S. economy. One aspect relates to the National Income and Product Accounts (NIPA), a summation reflecting the entire complex of the nation's economic income and output and the interaction of its major components; the other relates to the distribution of money income to families and individuals or consumer income. New information from the American Community Survey may be found in Tables 689–692.

The primary source for data on GDP, GNP, national and personal income, gross saving and investment, and fixed reproducible tangible wealth is the *Survey of Current Business*, published monthly by the Bureau of Economic Analysis (BEA). A comprehensive revision to the NIPA was released beginning in October 1999. Discussions of the revision appeared in the January, June, August, September and the December 2003 issues of the *Survey of Current Business*. Summary historical estimates appeared in the February 2004 issue of the *Survey of Current Business*. Detailed historical data on the NIPA are available on an interactive Web site at <<http://www.bea.doc.gov/bea/dn/nipaweb/index.aspx>>.

Sources of income distribution data are the decennial censuses of population and the Current Population Survey (CPS), both products of the U.S. Census Bureau (see text, Section 1 and Section 4). Annual data on income of families, individuals, and households are presented in *Current Population Reports, Consumer Income*, P60 Series, in print, and many data series found on the Census Web site at <<http://www.census.gov/hhes/www/income.html>>. Data on the household sector's saving and assets are published

by the Board of Governors of the Federal Reserve System in the quarterly *Flow of Funds Accounts*. The Board also periodically conducts the *Survey of Consumer Finances*, which presents financial information on family assets and net worth. Detailed information on personal wealth is published periodically by the Internal Revenue Service (IRS) in *SOI Bulletin*.

National income and product—Gross domestic product is the total output of goods and services produced by labor and property located in the United States, valued at market prices. GDP can be viewed in terms of the expenditure categories that comprise its major components purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production located in the United States. Gross state product (GSP) is the gross market value of the goods and services attributable to labor and property located in a state. It is the state counterpart of the nation's gross domestic product.

In January 1996, BEA replaced its fixed weighted index as the featured measure of real GDP with an index based on chain type annual weights. Changes in this measure of real output and prices are calculated as the average of changes based on weights for the current and preceding years. (Components of real output are weighted by price, and components of prices are weighted by output.) These annual changes are "chained" (multiplied) together to form a time series that allows for the effects of changes in relative prices and changes in the composition of output over time. Quarterly and monthly

changes are also based on annual weights. The new output indexes are expressed as 2000=100, and for recent years, in 2000 dollars; the new price indexes are based to 2000=100. For more information on chain-dollar indexes, see the article on this subject in the November 2003 issue of the *Survey of Current Business*.

Chained (2000) dollar estimates of most components of GDP are not published for periods prior to 1990, because during periods far from the base period, the levels of the components may provide misleading information about their contributions to an aggregate. Values are published in index form (2000=100) for 1929 to the present to allow users to calculate the percent changes for all components, changes that are accurate for all periods.

Gross national product measures the output attributable to all labor and property supplied by United States residents. GNP differs from "national income" mainly in that GNP includes allowances for depreciation consumption of fixed capital.

National Income includes all net incomes (net of CFC) earned in production. National income is the sum of compensation of employees, proprietors' income with inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj), rental income of persons with CCAdj, corporate profits with IVA and CCAdj, net interest and miscellaneous payments, taxes on production and imports, business current transfer payments, current surplus of government enterprises, less subsidies.

Capital consumption adjustment for corporations and for nonfarm sole proprietorships and partnerships is the difference between capital consumption based on income tax returns and capital consumption measured using empirical evidence on prices of used equipment and structures in resale markets, which have shown that depreciation for most types of assets approximates a geometric pattern. The tax return data are valued at historical costs and reflect changes over time in service lives and depreciation patterns as permitted by tax regulations. *Inventory*

valuation adjustment represents the difference between the book value of inventories used up in production and the cost of replacing them.

Personal income is the current income received by persons from all sources minus their personal contributions for government social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), non-profit institutions that primarily serve individuals, private trust funds, and private noninsured welfare funds. Personal income includes personal current transfer receipts (payments not resulting from current production) from government and business such as social security benefits, public assistance, etc., but excludes transfers among persons. Also included are certain nonmonetary types of income chiefly, estimated net rental value to owner-occupants of their homes and the value of services furnished without payment by financial intermediaries. Capital gains (net losses) are excluded.

Disposable personal income is personal income less personal current taxes. It is the income available to persons for spending or saving. Personal current taxes are tax payments (net of refunds) by persons (except personal contributions for government social insurance) that are not chargeable to business expense and certain personal payments to general government that are treated like taxes. Personal taxes include income, estate and gift, and personal property taxes and motor vehicle licenses. Nontax payments include passport fees, fines and forfeitures, and donations.

Gross domestic product by industry—The BEA also prepares estimates of value added by industry. *Value added* is a measure of the contribution of each private industry and of government to the Nation's GDP. It is defined as an industry's gross output (which consists of sales or receipts and other operating income, commodity taxes, and inventory change) minus its intermediate inputs (which consists of energy, raw materials, semi-finished goods, and services that are purchased from domestic industries or from foreign sources). These estimates of value added are produced for 61 private

industries and for 4 government classifications—federal general government and government enterprises and state and local general government and government enterprises.

The estimates by industry are available in current dollars and are derived from the estimates of gross domestic income, which consists of three components the compensation of employees, gross operating surplus, and taxes on production and imports, less subsidies. Real, or inflation-adjusted, estimates are also prepared.

Regional Economic Accounts—These accounts consist of estimates of state and local area personal income and of gross state product and are consistent with estimates of personal income and gross domestic product in the Bureau's national economic accounts. BEA's estimates of state and local area personal income provide a framework for analyzing individual state and local economies, and they show how the economies compare with each other. The *personal income* of a state and/or local area is the income received by, or on behalf of, the residents of that state or area. Estimates of labor and proprietors' earnings by place of work indicate the economic activity of business and government within that area, and estimates of personal income by place of residence indicate the income within the area that is available for spending. BEA prepares estimates for states, counties, metropolitan areas, and BEA economic areas.

Gross state product estimates measure the value added to the Nation's production by the labor and property in each state. GSP is often considered the state counterpart of the Nation's GDP. The GSP estimates provide the basis for analyzing the regional impacts of national economic trends. GSP is measured as the sum of the distributions by industry and state of the components of gross domestic income that is, the sum of the costs incurred and incomes earned in the production of GDP. The GSP estimates are presented in current dollars and in real (chained dollars) for 63 industries.

Consumer Expenditure Survey—The Consumer Expenditure Survey program was begun in late 1979. The principal objective of the survey is to collect current consumer expenditure data, which provide a continuous flow of data on the buying habits of American consumers. The data are necessary for future revisions of the Consumer Price Index.

The survey conducted by the Census Bureau for the Bureau of Labor Statistics consists of two components: (1) an interview panel survey in which the expenditures of consumer units are obtained in five interviews conducted every 3 months, and (2) a diary or recordkeeping survey completed by participating households for two consecutive 1-week period.

Each component of the survey queries an independent sample of consumer units representative of the U.S. total population. Over 52 weeks of the year, 5,000 consumer units are sampled for the diary survey. Each consumer unit keeps a diary for two 1-week periods yielding approximately 10,000 diaries a year. The interview sample is selected on a rotating panel basis, targeted at 5,000 consumer units per quarter. Data are collected in 88 urban and 16 rural areas of the country that are representative of the U.S. total population. The survey includes students in student housing. Data from the two surveys are combined; integration is necessary to permit analysis of total family expenditures because neither the diary nor quarterly interview survey was designed to collect a complete account of consumer spending.

Distribution of money income to families and individuals—Money income statistics are based on data collected in various field surveys of income conducted since 1936. Since 1947, the Census Bureau has collected the data on an annual basis and published them in *Current Population Reports*, P60 Series. In each of the surveys, field representatives interview samples of the population with respect to income received during the previous year. *Money income* as defined by the Census Bureau differs from the BEA concept of "personal income." Data on consumer income collected in the CPS by the Census Bureau cover money income

received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, social security, union dues, medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits (see Section 11) such as food stamps, health benefits, and subsidized housing; that some farm families receive noncash benefits in the form of rent-free housing and goods produced and consumed on the farm; or that noncash benefits are also received by some nonfarm residents which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. None of the aggregate income concepts (GDP, national income, or personal income) is exactly comparable with money income, although personal income is the closest.

In October 1983, the Census Bureau began to collect data under the new Survey of Income and Program Participation (SIPP). The data collected in SIPP will be used to study federal and state aid programs (such as food stamps, welfare, medicaid, and subsidized housing), to estimate program costs and coverage, and to assess the effects of proposed changes in program eligibility rules or benefit levels. The core questions are repeated at each interview and cover labor force activity, the types and amounts of income received, and participation status in various programs. The core also contains questions covering attendance in postsecondary schools and private health insurance coverage. Various supplements or topical modules covering areas such as educational attainment, assets and liabilities, and pension plan coverage are periodically included.

Poverty—Families and unrelated individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by Federal Interagency Committees in 1969 and 1980.

The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food stamps, medicaid, and public housing. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index. The following technical changes to the thresholds were made in 1981: (1) distinctions based on sex of householder have been eliminated, (2) separate thresholds for farm families have been dropped, and (3) the matrix has been expanded to families of nine or more persons from the old cutoff of seven or more persons. These changes have been incorporated in the calculation of poverty data beginning with 1981. Besides the Census Bureau Web site at <<http://www.census.gov/hhes/www/poverty.html>>, information on poverty guidelines and research may be found at the U.S. Department of Human Services Web site at <<http://aspe.hhs.gov/poverty/poverty.shtml>>.

In the recent past, the Census Bureau has published a number of technical papers that presented experimental poverty estimates based on income definitions that counted the value of selected government noncash benefits. The Census Bureau has also published annual reports on aftertax income. In addition, in July 1999, the Census Bureau released a report (P60-205) that showed the effect of using experimental poverty following the recommendations of a National Academy of Sciences panel on redefining our nation's poverty measure and recently published a report entitled *Alternative Poverty Estimates in the United States: 2003*.

Statistical reliability—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability pertaining to Census Bureau data, see Appendix III.

Table 650. Gross Domestic Product in Current and Real (2000) Dollars: 1960 to 2004

[In billions of dollars (\$526.4 represents \$526,400,000,000). For explanation of gross domestic product and chained dollars, see text, this section]

| Item | 1960 | 1970 | 1980 | 1990 | 1992 | 1993 | 1994 | 1995 | 1996 | 1997 | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 | 2004 |

Table 651. Gross Domestic Product in Current and Real (2000) Dollars by Industry: 2000 to 2004

[In billions of dollars (\$9,817.0 represents \$9,817,000,000,000). Data are based on the 1997 NAICS. Data include nonfactor charges (capital consumption allowances, indirect business taxes, etc.) as well as factor charges against gross product; corporate profits and capital consumption allowances have been shifted from a company to an establishment basis]

| Industry | Current dollars | | | | Chained (2000) dollars | | | |
|--|-----------------|-----------------|-----------------|-----------------|------------------------|-----------------|-----------------|-----------------|
| | 2000 | 2002 | 2003 | 2004 | 2000 | 2002 | 2003 | 2004 |

- Represents zero.

¹ Includes industries not shown separately.

² Includes Federal civilian and military and state and local government.

³ States will not add to U.S. total as chained-dollar estimates are usually not additive.

Table 661. Personal Income in Current and Constant (2000) Dollars by State: 1990 to 2004

[In billions of dollars (\$4,861.9 represents \$4,861,900,000,000). Represents a measure of income received from all sources during the calendar year by residents of each state. Data exclude federal employees overseas and U.S. residents employed by private U.S. firms on temporary foreign assignment. Totals may differ from those in Tables 656, 657, and 659]

¹ Includes other races not shown separately. ² Data reflect implementation of Census 2000-based population controls and a 28,000 household sample expansion to 78,000 households. ³ Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population. ⁴ Data represents White alone, which refers to people who reported White and did not report any other race category. ⁵ Data represents Black alone, which refers to people who reported Black and did not report any other race category. ⁶ Data represents Asian alone, which refers to people who reported Asian and did not report any other race category. ⁷ People of Hispanic origin may be of any race.

| 2003 | 9,274 | 16.5 | 18.3 | 16.1 | 16.7 | 16.6 | 7.9 | 7.9 | 34,272 | |

¹ Includes other races not shown separately. ² Data reflect implementation of Census 2000-based population controls and a 28,000 household sample expansion to 78,000 households. ³ Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population. ⁴ Data represents White alone, which refers to people who reported White and did not report any other race category. ⁵ Data represents Black alone, which refers to people who reported Black and did not report any other race category. ⁶ Data represents Asian alone, which refers to people who reported Asian and did not report any other race category. ⁷ People of Hispanic origin may be of any race.

NA Not available. ¹ Implementation of Census 2000-based population controls and sample expanded by 28,000 households. ² Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population. ³ Includes other races not shown separately. ⁴ Beginning with 2002, data represents White alone, which refers to people who reported White and did not report any other race category. ⁵ Beginning with 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. ⁶ Beginning with 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. ⁷ People of Hispanic origin may be of any race.

NA Not available. ¹ Includes other races not shown separately. ² Beginning with 2002, data represents White alone, which refers to people who reported White and did not report any other race category. ³ Beginning with 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. ⁴ Beginning with 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. ⁵ People of Hispanic origin may be of any race. ⁶ Implementation of Census 2000-based population controls and sample expanded by 28,000 households. ⁷ Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population.

Table 688. Money Income of People—Number by Income Level and by Sex, Race, and Hispanic Origin: 2003

[In thousands. People as of March of the following year. (110,257 represents 110,257,000). Based on Current Population Survey (CPS); see text, Sections 1 and 13, and Appendix III.]

Table 690. Family Income—Distribution by Income Level and State: 2003

[In thousands (73,058 represents 73,058,000), except as indicated. The American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see Appendix III. For definition of median, see Guide to Tabular Presentation.]

| State | Number of families (1,000) | Number of families by income level (1,000) | | | | | | | | Median income (dot.) |
|-----------------------------------|----------------------------------|--|-----------------------|-----------------------|-----------------------|-------------------------|-------------------------|-----------------------|--------|----------------------------|
| | | Under \$25,000 | \$25,000- \$49,999 | \$50,000- \$74,999 | \$75,000- \$99,999 | \$100,000- \$149,999 | \$150,000- \$199,999 | \$200,000 and over | | |

Table 692. **Individuals and Families Below Poverty Level—Number and Rate by State: 2000 and 2003**

[In thousands (33,311 represents 33,311,000), except as indicated. Represents number and percent below poverty in the past 12 months. The American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see Appendix III. For definition of median, see Guide to Tabular Presentation]

| 2003 . . . | 35,861 | 24,272 | 8,781 | 1,401 | 9,051 | 12.5 | 10.5 | 24.4 | 11.8 | 22.5 | 48,687 | 16.9 | | | | | | | | | | |

NA Not available. ¹ Includes other races not shown separately. ² Beginning 2002, data represents White alone, which refers to people who reported White and did not report any other race category. ³ Beginning 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. ⁴ Beginning 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. ⁵ People of Hispanic origin may be of any race. ⁶ Implementation of Census 2000-based population controls and sample expanded by 28,000 households. ⁷ Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population.

NA Not available. ¹ Includes other races not shown separately. ² Beginning 2002, data represents White alone, which refers to people who reported White and did not report any other race category. ³ Beginning 2002, data represents Black alone, which refers to people who reported Black and did not report any other race category. ⁴ Beginning 2002, data represents Asian alone, which refers to people who reported Asian and did not report any other race category. ⁵ People of Hispanic origin may be of any race. ⁶ Implementation of Census 2000-based population controls and sample expanded by 28,000 households. ⁷ Beginning with the 2003 Current Population Survey (CPS), the questionnaire allowed respondents to choose more than one race. For 2002 and later, data represent persons who selected this race group only and excludes persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population.

Table 699. Families Below Poverty Level by Selected Characteristics: 2003

[Families as of March 2004. (7,607 represents 7,607,000). Based on Current Population Survey (CPS); see text, this section and Section 1, and Appendix III. The 2004 CPS allowed respondents to choose more than one race. For 2003, data represent persons who selected this race group only and exclude persons reporting more than one race. The CPS in prior years allowed respondents to report only one race group. See also comments on race in the text for Section 1, Population]

| Characteristic | Number below poverty level (1,000) | | | | | Percent below poverty level | | | | |
